

INCREASE EFFICIENCY, REVENUE AND ENHANCE CARE WITH JUST ONE TOUCH

CLINICAL SERVICES

- Identify missed revenue by capturing and confirming services in real time
- Electronically document services at the time they are provided
- Create a reliable data trail for clinical monitoring
- Capture vital signs and related observations to populate the EHR in real time for clinical monitoring or printed reports
- Eliminate paperwork and human error- improve care and reduce costs

DINING SERVICES

- Capture meal attendance including guest meals and tray service
- Track guest meals and tray service fees by sending real time confirmation straight to billing
- Track percentage of meal consumption for nutritionally at-risk residents

HOUSEKEEPING SERVICES

- Track and monitor labor costs not billable for resident care
- Confirm unscheduled housekeeping services in real time for billing
- Update or alter housekeeping task schedules informing workforce in real time while in the field

BEAUTY SHOP

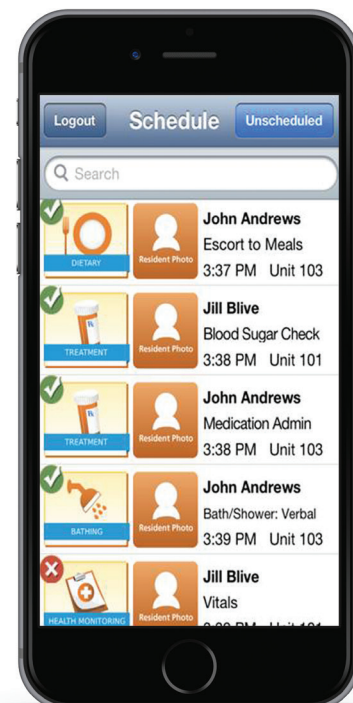

- Eliminate cash and check transactions
- One tap confirmation of provided services goes directly to the invoice for monthly billing

SOCIAL/RECREATIONAL ACTIVITIES

- Document resident activity attendance

MAINTENANCE

- Schedule and record all unit and physical plant maintenance activities
- Schedule and document Preventative Maintenance Program tasks
- Receive, schedule, document, and monitor maintenance work orders
- Perform pre- and post-occupancy e-assessments on units for timely turn-around

“All the information I need goes with me where I am in the building, and everything I need to know to care for my residents is in one place. I don’t have to go through different books, charts, etc. and that makes it easy and faster for me.”

*Megan, Home Health Aide,
Epiphany Assisted Living*

CONNECTING THE CAREGIVER TO THE ELECTRONIC HEALTH RECORD

Point of Care's innovative mobile software allows senior community personnel to document and track services provided to residents in real time, integrating the data into each resident's Electronic Health Record.

MOBILE TECHNOLOGY THAT CHANGES THE WAY YOU DO BUSINESS

From health care and housekeeping to medication and meals, Eldermark's Point of Care takes database management out into the field of day-to-day operations. With a single tap, staff can confirm resident services on demand, all from one intuitive app. No more time-consuming paperwork. No more human error. No more lost revenue.

- **Increase revenue by documenting unscheduled services to recover lost/missed income.**

- Current clients have achieved 38-42% profit margins.
- Current clients have captured missed revenue of \$300 on average per resident per month.

- **Increase efficiency and improve care by freeing up staff to spend more time with residents**

- Current clients report freeing up 20-30 minutes per caregiver per shift.

It's time for change. Stop filling out paperwork. Start capturing missed revenue and improving care.

"We increased revenues after just the first month and by streamlining processes we almost instantly improved quality of care.

We use an iPod touch at the Point of Care to substitute centralized, manual data entry. This wonderful new way of recording care and services not only saves us the expense of paper and labor, but it has improved the quality of data."

Matilda, Administrative Assistant, The Glenn by St. Therese Southwest
