

INTRODUCING A STREAMLINED APPROACH TO PATIENT-CENTERED, COORDINATED CARE

The most comprehensive senior housing software in the industry is now a powerful Health Information Exchange (HIE) enabling senior communities, clinic providers and vendors to share vital clinical data quickly and securely.

“As a physician servicing residents in assisted living, having the correct information is critical to good care. All too often the most important documents are not available at the time of the visit.

Simply Connect solves this issue and greatly improves our ability to care for the patient appropriately at crucial times.”

*Dr. Todd Stivland, CEO
Bluestone Physician Services*

AN ELEGANT SOLUTION

Simply Connect’s interoperable exchange is intuitively designed to move virtual health records across systems in formats all parties can use and understand—facilitating more effective and seamless transitions of care.

A PATH TOWARD IMPROVING CARE

Simply Connect makes obtaining health care information—along the entire continuum of health care delivery—secure, simple and convenient.

- Administer electronic resident admissions and discharges
- Secure hospital referrals by ensuring HIE compliance
- Communicate electronically to any physician, clinic or hospital
- Increase resident Continuity of Care
- Transform your senior housing facility into a HIE leader
- Save time, resources and money - and do it all with 100% HIPAA compliance

SIMPLY CONNECT SECURE FEATURES

- **Virtual Resident Personal Health Record:** Moves e-documents from the nurse's desktop to the virtual personal health record to provide a complete health picture of each resident.
- **Continuity of Care Document:** Provides standardized form moved to and from Simply Connect participants to update resident's real-time health status.
- **Care Coordination Alerts:** Delivers real-time notifications to caregivers, family members and vendors regarding changes in resident's care or insurance.
- **Vendor Nation:** Connects key vendors to a private HIE and the virtual health record for record sharing, improved care and payer management.
- **Record Locator:** Enables quick search for specific resident health data using individual's identifying criteria (D.O.B, Medicare #, etc.).
- **Query:** Enables searching for and sharing of specified health records in real time.
- **Direct Secure Messaging:** Sending and receiving secure information over the internet without the use of the fax machine.
- **Analytics:** Transforms care data into insight for making better care decisions.
- **Physician Portal View:** Gives community physician direct access to resident's virtual health record.
- **Physician Orders:** Routes orders electronically—and simultaneously—to both the vendor and senior living provider
- **Cloud Scanning:** Provides complete EHR management by scanning paper documents to a cloud repository.
- **Master Medication Record (MMR):** Holds a master drug record connected to EMAR or pharmacy dispensing list providing real time resident drug listings.
- **Electronic Medication Alert System (eMAS):** Enables identification of conflicting medications for chronic conditions, such as falls, allowing care providers to properly review drug reactions with a single click.

“The elegance of our system is that it gives clinicians the time to do what they do best: spend more time with their residents.”

*Craig Patnode
Eldermark Founder & CEO*

Let us show you how HIE technology designed specifically for senior care can advance your business by improving quality, enhancing services to patients, increasing compliance, and saving health care dollars.
